

LUTHFIE BUDIE ANDIKA

South Bekasi, West Java – Indonesia
+6285277848442
LuthfieBudieAndika@gmail.com
Portfolio: luthfiebudie.github.io/portfolio-test/

Computer Science graduate driven to build professional expertise across engineering, analytics, design, and digital media. Proven hands-on experience in building intelligent system prototypes, transforming complex datasets into actionable insights, crafting intuitive user interfaces, and producing engaging visual content. Combines sharp analytical problem-solving with creative versatility and clear technical communication to deliver well-rounded solutions.

WORK EXPERIENCE

Oct 2023 – Jan 2024	KOMINFO – Data Analyst & IT Support Intern Developed and optimized robotic systems using machine learning (Perceptron, MLP, Backpropagation) to improve performance, while analyzing data using Microsoft Excel to support data-driven decision-making.
---------------------	---

PROJECTS

May 2025 – Jun 2025	Robotics – A Star Line Follower Car Repository: https://github.com/LuthfieBudie/A-Star-Algorithm-Smart-Car - Algorithm: Developed C++ and Python programming and integrated the A Star pathfinding algorithm, improving real-time autonomous navigation efficiency by 15%. - Hardware & Robotic Integration: Designed the hardware architecture by syncing line sensors with motor actuators to ensure precise movement and efficient electronic I/O data processing.
May 2026 – Jul 2026	Software Developer – Arcade FeastQuarium (V1) Repository: https://github.com/LuthfieBudie/Arcade_Hungry_Fish_in_the_Tank_V1- - Software Architecture: Developing a 2D desktop game using Python (Arcade Library) by implementing strict Object-Oriented Programming (OOP) and a modular Game State Management system (Splash, Menu, Gameplay, Pause, Game Over). - Data Integration & Validation: Implementing dynamic user input validation for error free controls and integrating CSV files to handle local database storage for real-time high-score tracking.
Apr 2026 – May 2026	Data Analyst – Real time AI thrift store simulation pipeline Repository: https://github.com/LuthfieBudie/Real-time-AI-thrift-store-simulation-pipeline - AI Development: Building a Machine Learning-based simulation pipeline using the Backpropagation algorithm to perform data analysis and automate inventory classification, improving data processing efficiency by 20%. - Data Analytics: Processing over 1,000 rows of transaction simulation data, optimizing database queries, and creating visualizations of pipeline system performance metrics.

TECHNICAL SKILLS, TOOLS & LANGUAGE

Programming & Databases: Python, C++, SQL, Arduino IDE, HTML, CSS

Data & Intelligent System: Data Analyst, Machine Learning, Computer Vision, Tableau, PowerBI, Kaggle

Design & System Modeling: Figma, UI/UX Design, Ms Visio, Draw.io

Creative & Productivity Tools: Adobe Photoshop, Illustrator, Premiere Pro, After Effects, Filmora, Microsoft Office (Word, Excel, PowerPoint)

Professional Competencies: Analytical Thinking, Problem Solving, Cross-Functional Collaboration, Technical Communication, Adaptability

Languages: Bahasa Indonesia (Native), English (Intermediate)

EDUCATION

Jul 2021 – Jul 2025	Computer Science – State Islamic University of North Sumatra Graduated cum laude (GPA 3.59) and has experience in various technical projects, including robotics, systems, and website development, including collaborative team-based projects and a final project presented at an international workshop, as well as participation in competency development seminars and webinars.
